Objective

In this challenge, we're getting started with conditional statements. Check out the <u>Tutorial</u> tab for learning materials and an instructional video!

Tack

Given an integer, n, perform the following conditional actions:

- If \boldsymbol{n} is odd, print Weird
- If n is even and in the inclusive range of 2 to 5, print Not Weird
- If *n* is even and in the inclusive range of **6** to **20**, print Weird
- If *n* is even and greater than **20**, print Not Weird

Complete the stub code provided in your editor to print whether or not n is weird.

Input Format

A single line containing a positive integer, n.

Constraints

• $1 \le n \le 100$

Output Format

Print Weird if the number is weird; otherwise, print Not Weird.

Sample Input 0

2

Sample Output 0

Weird

Sample Input 1

24

Sample Output 1

Not Weird

Explanation

Sample Case 0: n = 3

 \boldsymbol{n} is odd and odd numbers are weird, so we print Weird.

Sample Case 1: n = 24

n>20 and \emph{n} is even, so it isn't weird. Thus, we print Not Weird.
